

1 - CONSTRUCTION

- Glass braid with silicone which main core is a red tinned copper braid, Class 5 NFC 32.013.
- Covered with several silicone impregnated glass braids.

2 - CHARACTERISTICS

SPECIFICATION	PVR 8
- Temperature of use	
- service	- 60 + 280 °C
- mini in peak	- 60 °C
- maxi in peak	+ 350 °C
- Dielectric Strenght	2500 V
- Use Voltage	500 V
- Test Voltage	2000 V

- Good resistance to thermal shocks.
- Good resistance to U.V.
- Very good aging.
- Good resistance to damp.

3 - APPLICATIONS

- Cabling of resistances : Electric domestic appliances.
- Kitchens, ovens.
- Machines for thermoplastics or rubber.

4 - PRESENTATION

- Conditioning : Roll from 50 to 200 m according to \varnothing or on bobbins.
- Colours : From \varnothing 1,9 to 4,6 : white - red - green - black - blue - yellow - yellow/green - brown.
From \varnothing 6,6 to 27,5 : brown - black - grey - red brown.
For other colours, please question us.

Tolerance on weight and diameters :
+ - 5%.

outside diameter mm	INSIDE CORE			linear resistance at 20°C ohm/km	intensity maxi admitted at 240°C
