

DOOR-SEAL for SELF-CLEANING OVENS

1/1

09/06

14

1 - CONSTRUCTION

This seal is made of :

- Tubular braid in glass yarns impregnated with graphit resin.
- Steel rod inside the tubular braid.
- Sewed glass tape to join the seal.

2 - CHARACTERISTICS

SPECIFICATION	UNIT	SAI04		
Width of the tubular braid	mm	22 ± 0.1		
Weight per metre	g/m	30 ± 2.0		
Diameter of the knitting	mm	10 ± 0.2		
Weight per metre	g/m	6.5 ± 0.5		
Compression under 5 daN	mm	11.5 ± 0.5		
Compression under 30 daN	mm	6.0 ± 1.0		
Diameter of the steel rod	mm	2.4		
Heat resistance	°C	400		

3 - APPLICATIONS

- This seal is used as airproofing behind the door of the self-cleaning oven, that is the reason why it is necessary to use the high temperature materials.

4 - PRESENTATION

- These seals are made according to the customers specifications.
